If the State agency has authorized or plans to authorize any above-50% vendors, FNS must certify the State agency’s vendor cost containment system. The State agency that has not yet received FNS certification must submit a request for certification/recertification that contains the following information.

☐ DOES NOT APPLY (PROCEED TO SECTION G)

1. Calculation of new competitive price levels

Describe how the State agency derived or will derive new competitive price levels for regular vendors, which exclude the prices of above-50-percent vendors. Each vendor submits its highest and lowest price for 12 food items from the WIC approved list of foods (market basket). To calculate an average for each vendor, all high prices and low prices are summed, to create a high price market basket and a low price market basket. These two market baskets are then averaged to create an average market basket per vendor. To determine the competitive threshold for each peer group, the average market baskets are averaged for the vendors in each peer group, and then multiplied by 120%. Individual vendor average market baskets are then compared to 120% of the average for their peer group. If a vendor is above the 120% threshold, they are classified as being non-competitive. This procedure is used to determine cost competitiveness for all peer groups (A50 and C categories and each subcategory within the B category). Above-50-Percent Vendors are placed in their own peer group (peer group A50) and vendors are only compared to their own peers within the same peer group.

2. Maximum allowable reimbursement levels for regular vendors and above-50-percent vendors

a. Explain how the State agency will ensure that average payments to above-50-percent vendors do not exceed average payments to comparable regular vendors.

The Maximum Allowable Department Reimbursement (MADR) rate for above-50-percent vendors is determined every four weeks and calculated as the average amount paid to regular vendors during the immediately preceding twelve-week period, by food item number/unit-priced group. Food instruments determined to have been partially-redeemed by regular vendors are removed from the data set prior to calculating the average payments to regular vendors.

b. The State agency plans to exempt above-50-percent vendors from the calculated competitive price criteria and maximum allowable reimbursement levels.

☐ Yes ☒ No If yes, how many vendors will be exempted? __________

Are these vendors needed to ensure participant access to supplemental foods?

☐ Yes ☒ No

c. The State agency applies peer-group-specific maximum allowable reimbursement levels to food instruments during the food instrument redemption process.

☒ Yes ☐ No If yes, describe the procedure or process used:

When a vendor claims a food instrument as being accepted by their store by submitting the serial number to the State agency, the MADR rate is assigned to that serial number based upon that vendor's peer group and the food item number of the food instrument. This information is provided to the California State Treasurer's Office, who will compare the amount presented for payment to the MADR rate. Food instruments with a present amount exceeding the MADR rate are rejected for payment and returned to the vendor. Food instruments with a present amount not exceeding the MADR rate continue to the next step in the payment edit process.

MADR rates for regular vendors are determined every four weeks based upon redemption over the immediately preceding twelve-weeks by Peer Group Category B 6-9 and 10+ register count subgroups. This average redemption is referred to as the Competitive Average Redemption Value (CARV). MADR rates are based upon the peer group of the vendor and food item number. Peer Group Category B (full-line) vendors are grouped into register count subgroups: 1-2, 3-5, 6-9 and 10+. Each register count subgroup is given a percentage tolerance factor above the CARV that is different depending on whether the food item number is a combination of different foods or a single food type. See appendix CA_2017_SecIII_IX-F2c for a table detailing the percentage tolerance factor allowed above the CARV for each of the Category B register count subgroups. Peer Group Category C is allowed no tolerance factor above the CARV.

The Peer Group Category A MADR rate calculation is outlined in 2.a., above.
IX. FOOD DELIVERY and FOOD INSTRUMENT (FI) ACCOUNTABILITY AND CONTROL
F. Vendor Cost Containment System Certification

3. Describe the State agency’s methodology for grouping above-50-percent vendors in its peer group system (i.e., separately or in peer groups with regular vendors) and the criteria the State agency uses to identify comparable vendors for each group of above-50-percent vendors. All above-50-percent vendors are placed in one peer group.

4. The State agency plans to exempt non-profit above-50-percent vendors from competitive price criteria and maximum allowable reimbursement levels.
   - Yes  ☒ No  If yes, provide the following information in detail:
     a. Describe the reason the State agency has decided to exempt such vendors (i.e., the benefits to the program) and the number of non-profit vendors to be exempted.
        N/A
     b. Describe the reason the non-profit above-50-percent vendors are needed to ensure participant access to supplemental foods.
        N/A
   c. Does the State agency collect shelf prices from non-profit vendors?
      - Yes  ☒ No
   d. Describe how the prices of the non-profit vendors compare to those of other vendors in their geographic area that are subject to competitive price criteria and allowable reimbursement levels.
      N/A
   e. Describe how the State agency establishes the level of reimbursement for the non-profit above-50-percent vendors that it has exempted.
      N/A

5. The State agency has fully implemented the competitive price criteria and maximum allowable reimbursement methodologies described in items 1 and 2 above.
   - ☒ Yes  ☐ No
   If the State agency has not fully implemented the revised competitive price and maximum allowable reimbursement methodologies, describe the current status of this effort and include the timetable for achieving full implementation.

6. The State agency plans to exempt pharmacy vendors from competitive price criteria and maximum allowable reimbursement levels.
   - ☐ Yes  ☒ No
   If yes, the State agency has confirmed that these pharmacies provide only exempt infant formula and/or WIC-eligible medical foods to program participants.

7. Does the State agency collect shelf prices from pharmacies that provide only exempt infant formula?
   - ☐ Yes  ☒ No

8. Complete the three tables on the following pages to demonstrate that the State agency’s procedure for establishing and implementing competitive price criteria and maximum allowable reimbursement levels ensures that average payments per food instrument or food item to above-50% vendors do not exceed average payments to regular vendors.
9. Please attach and cite of a copy of the report(s) that the State agency will use to monitor average payments per food instrument to above-50% vendors and regular vendors. If the State agency does not have such a report, describe the State agency’s plans to develop and implement a report(s) for monitoring purposes, including the report contents or fields.

Question 8:
California has only one A50 peer group, which is peer group 20. The template does not allow for insertion of a peer group label. Since California has an approved cost containment plan, effective June 1, 2014, no change in competitive price criteria or MADR rates is reflected in the time period shown in the table. The values in the table all reflect actual redemption information for the time periods requested. Several new food items were introduced at the beginning April with maximum allowable rates based on shelf price survey data. The initial shelf price-based rates were in effect for all peer groups until the end of April when new maximum allowable rates began to calculate using actual redemption information. FIs accepted prior to the change in rates were still being paid into the month of May, following the rate adjustment. This resulted in much higher than normal difference in redemption averages between the A50 and Regular vendor peer groups for these two months. Reimbursement of A50 vendors has been cost neutral since the adjustment of reimbursement rates using actual redemption data.

Question 9:
California evaluates cost neutrality on a quarterly basis using the T-test worksheets provided by USDA and makes adjustments to future A50 reimbursement rates based on prior redemption by regular vendors. MADR rates for A50 vendors are set every four weeks during the quarter based on prior redemption by regular vendors over a twelve week period. Since future redemption by regular vendors cannot be anticipated, the only measure that can be used to ensure A50 cost neutrality is prior redemption by regular vendors. During periods where food prices deflate, a monthly snapshot of redemption comparing A50 redemption to regular vendor redemption can give the appearance of overpayment to A50 vendors, when future MADR rates for A50 vendors will actually be adjusted, limiting future redemption to correct for this occurrence and preserving cost neutrality.
Table 1. Data for WIC Vendor Cost Containment Certification – Overview

Please provide the following information on the regular vendors and the above-50-percent vendors authorized by the State agency as of June 30th. If data are not available through June 30th, the State agency should enter data for the period for which data are available, replacing “June” with the month to which the data are applicable.

**Instructions:**
Column 1 – Assign a sequential number to each peer group.

Column 2 – Describe the vendors in the peer group.

Column 3 – Insert the number of authorized vendors that are regular vendors.

Column 4 – Insert the number of above-50-percent vendors currently authorized.

Column 5 – Insert the total number of authorized vendors. This number should be the sum of columns 3 and 4, since the State agency must identify each vendor as being either a regular vendor or an above-50-percent vendor.

Column 6 – For each peer group that contains above-50-percent vendors, insert the number of the peer group that contains comparable regular vendors. The comparable vendor peer group is the peer group that the State agency uses to derive the competitive price criteria and maximum reimbursement levels that it applies to the above-50-percent vendors. If above-50-percent vendors are placed in a peer group with regular vendors, then the number in column 1 should be the same as that in column 6. If above-50-percent vendors are in separate peer groups, then the number in column 1 will be different from that in column 6.

Instructions:

Begin by identifying the above-50-percent vendors to which the data in the chart refer. Insert the peer group number for the above-50-percent vendors and write it on the line at the top of the chart. All data in the chart should pertain only to the above-50-percent vendors in the peer group and the comparable regular vendors. Complete a separate table for each group of above-50-percent vendors and comparable regular vendors identified in the table 2.

Column 1 – Insert the food instrument (FI) type or number and list the foods included on the FI. Include no more than two infant formula food instrument types, but complete the chart using the next most frequently redeemed food instrument types.

Column 2 – For each type of FI identified in column 1, insert the number of food instruments redeemed (paid) in June (the calendar month). If the State agency implemented competitive price criteria and allowable reimbursement levels that comply with the new vendor cost containment requirements before June, then select the calendar month before the State agency applied the new competitive price criteria and allowable reimbursement levels.

Columns 3 & 4 – Insert the average food instrument redemption amount and the standard deviation for the above-50-percent vendors and for the regular vendors that the State agency has identified in Table 2 as comparable vendors. As an alternative to providing average payments to comparable regular vendors, the State agency may enter average payments to all regular vendors. If the State agency provides data for all regular vendors rather than average payment to comparable vendors, indicate this on the table or in the accompanying narrative.

Column 5 – Subtract the amount in column 4 from the amount in column 3 and enter the difference here. If the amount in column 3 is less than that in column 4, enter the difference as a negative dollar amount.

Column 6 – Insert the average food instrument redemption amount for above-50-percent vendors after the State agency has applied the revised competitive price criteria and allowable reimbursement levels. If the State agency has implemented new competitive price criteria and allowable reimbursement levels before submitting its request for certification to FNS, then the data in column 6 should be actual redemption data for the above-50-percent vendors and comparable regular vendors. Insert the calendar month(s) to which the data pertain. If the State agency does not have actual redemption data, then the State agency must estimate the new average redemption amounts.

Column 7 – Insert the average redemption amounts for the corresponding group of comparable vendors. If the State agency has not yet implemented its revised methodologies, insert the target date to which the estimated average redemption amounts would apply. In the narrative that accompanies this data, discuss in detail the rationale for the State agency’s estimated average redemption amounts in columns 6 and 7. The average redemption amount for above-50-percent vendors may not exceed the average redemption amount for comparable vendors.
